

SECTION: 200.140**SUBJECT: VEHICLE PURSUIT****POLICY:**

Vehicular pursuit of fleeing suspects presents a danger to the lives of the public, deputies, and suspects involved in the pursuit. It is the policy of the Dane County Sheriff's Office to protect all persons' lives to the extent possible when enforcing the law. In addition, it is the responsibility of the Sheriff's Office to guide deputies in the safe performance of their duties. To effect these obligations, it shall be the policy of the Dane County Sheriff's Office to narrowly regulate the manner in which a vehicular pursuit is undertaken and performed.

PURPOSE:

The purpose of this policy is to state the guidelines to be followed during a vehicular pursuit. The procedures are intended to assist deputies and supervisors in making sound decisions.

The Sheriff's Office acknowledges that the possibility of a collision exists even when the above guidelines have been followed and the deputy has acted with due regard throughout the pursuit. This policy shall not be construed to place the responsibility for the effect of unforeseeable or uncontrollable conditions on the deputy.

DEFINITIONS:

Boxing In - A technique in which deputies position their squad cars in front of and beside the violator's vehicle in an effort to slow down or stop the violator.

Channeling - To divert or direct a vehicle to a different location.

Due Regard - The degree of care that a reasonably careful person, performing similar duties and acting under similar circumstances, would show.

Infraction - Minor violations of motor vehicle statutes or ordinances that pose no safety threat. Examples would include equipment or registration violations, noise violations or moving violations that are not a danger to the public.

Pursuit Intervention Technique (PIT) - Intentional acts of using a law enforcement vehicle to physically force a fleeing vehicle from a course of travel in order to stop it. The PIT is a specific technical maneuver that requires advanced practical training prior to use.

42

43 Ramming - The deliberate act of impacting a violator's vehicle with another vehicle
44 to functionally damage or otherwise force the violator's vehicle to stop.

45

46 Roadblock - A roadblock is the placing of obstacles or barricades, which are intended to prevent
47 the suspect from passing that point, into the path of a fleeing vehicle.

48

49 Refusal to Stop – An active attempt by one or more law enforcement officers to stop a motor
50 vehicle by use of emergency lights and siren, during which time the operator of the motor
51 vehicle is driving at a reasonable speed (i.e., at or below the established speed limit), but
52 willfully refusing to pull over and stop.

53

54 Unmarked - An unmarked squad car is one without decals identifying it as a Dane County
55 Sheriff's squad car.

56

57 Vehicle Pursuit - An active attempt by a deputy in an authorized emergency vehicle to
58 apprehend one or more occupants of a moving motor vehicle, providing the driver of such
59 vehicle is aware of the attempt and is resisting apprehension by maintaining or increasing
60 his/her speed, taking evasive action, or by ignoring the deputy's attempt to stop him/her.

61

62 PROCEDURES:

63

64 I. Initiation and Continuation of Pursuit

65

66 The decision to initiate and continue a pursuit must be based on the pursuing deputy's
67 conclusion that the necessity of immediate apprehension outweighs the risk to the
68 community should the suspect remain at large.

69

70 Justification for engaging in a vehicle pursuit must be based on facts known by the
71 deputy when the decision is made to engage in a pursuit. Information not established as
72 fact at the time the pursuit was initiated cannot be considered later in determining
73 whether the pursuit was justified. In all instances of vehicle pursuits, the initiating officer
74 must be able to clearly articulate the reason(s) why a pursuit was initiated.

75

76 A. The objective Risk Factors identified in this section and classified as lower,
77 moderate or high risk should be continuously evaluated by the pursuing deputies
78 and supervisors monitoring the pursuit and applied in accordance with the Pursuit
79 Decision-Making Matrix

80

81 1. Low Risk Factors

82

83 a. Fully marked Sheriff's Vehicle.

- 84 b. Speeds less than 20 MPH over the fixed or posted limit.
- 85 c. Straight roads, good surface, clear lines of sight.
- 86 d. Few intersections.
- 87 e. Light or no other vehicular traffic.
- 88 f. No pedestrians or bicyclists.
- 89 g. Good weather; clear, daylight.
- 90 h. No hazardous maneuvers by violator.
- 91 i. Supervisor involved and effective oversight of pursuit.
- 92 j. Pursuing deputy in full control, emotionally calm.
- 93 k. Authorized number of sheriff's vehicles involved in pursuit.
- 94

95 2. Moderate Risk Factors

96

- 97 a. Speeds of 20 MPH or more over the fixed or posted speed limit.
- 98 b. Moderate motor vehicle traffic, little or no congestion.
- 99 c. Some intersecting streets.
- 100 d. Pedestrian traffic.
- 101 e. Bicycle traffic.
- 102 f. Unmarked squad, or non-pursuit rated law enforcement vehicle - In the
- 103 event a pursuit is initiated by an unmarked unit, that unit should turn
- 104 the primary position over to a marked unit at the earliest possible time.
- 105 The unmarked unit can remain in the pursuit until a second marked unit
- 106 is able to get involved. At the point that the second marked unit gets
- 107 involved, the unmarked unit shall discontinue the pursuit. The
- 108 unmarked unit shall remain available to respond to the scene if the
- 109 suspect is apprehended, unless otherwise directed by a supervisor.
- 110 g. Deputy generally calm, under control.
- 111 h. Some hazardous, but not extreme maneuvers (i.e., Crossing centerline to
- 112 pass vehicles, sudden lane change) by the violator.
- 113 i. Supervisor involved and effective.
- 114 j. Authorized number of vehicles involved in the pursuit.
- 115

116 3. High Risk Factors

117

- 118 a. Speeds twice the fixed or posted speed limit, or more than 80 M.P.H.

- 119 b. Police vehicle in pursuit is equipped with 4-wheel drive and/or is not
120 pursuit rated. Deputies driving a department van or truck, non-pursuit
121 rated sport utility vehicle, service patrol type vehicle, K-9 Team Vehicle
122 (with K-9), specialized vehicle or motorcycle should not become involved
123 in a pursuit unless there are exigent circumstances.
- 124 c. Heavy congested motor vehicle traffic.
- 125 d. Numerous intersecting streets (e.g. business district.)
- 126 e. Blind curves or intersections, narrow roads.
- 127 f. Numerous pedestrians.
- 128 g. Poor weather, slippery streets, low visibility.
- 129 h. Special circumstances:
- 130 • school zone
 - 131 • residential neighborhoods
 - 132 • business district
 - 133 • construction zones
 - 134 • And other areas of the city/county where large numbers of people
135 may be in attendance at the time of the pursuit.
- 136 i. Pursuit leaves the roadway.
- 137 j. Extremely hazardous maneuvers (e.g., driving against oncoming traffic,
138 failing to stop at traffic signals or stop signs etc.) by the violator.
- 139 k. Pursued vehicle has less than four wheels.
- 140 l. Driver of the pursued vehicle is a known juvenile.
- 141 m. No supervisor involved, or ineffective supervisory oversight of pursuit.
- 142 n. Deputy excited, not in full control of emotions.
- 143 o. Sheriff's vehicles participating in pursuit exceed authorized number.
- 144
- 145 4. Other Considerations: In addition to the above Risk Factors, pursuing deputy
146 and supervisor should also consider:
- 147
- 148 a. The deputy's skill, training and knowledge of area roads and terrain:
- 149
- 150 • Inexperience – higher risk.
 - 151 • Lack of knowledge of area- higher risk
 - 152
- 153 b. The nature and severity of the offense and the necessity to pursue:
- 154
- 155 • Nature & Severity described in decision-making Matrix table.

156
157
158
159
160
161
162
163
164

- Necessity to pursue.

B. PURSUIT DECISION MAKING MATRIX - Deputies and Supervisors should utilize the Objective Risk Criteria above to determine Degree of Risk and compare with Degree of Seriousness of violation to aid assessing whether the pursuit should be allowed to continue, or whether it should be terminated.

DEGREE OF SERIOUSNESS	Decision Threshold		
	Low	Moderate	High
VIOLENT FELONY - IMMINENT THREAT	May pursue: Continue to assess risks	May pursue: Continue to assess risks	May pursue: Discontinue if risks exceed known threat to public safety if capture is delayed
FELONY-VIOLENT	May pursue: Continue to assess risks	May pursue: Continue to assess risks	May pursue: Discontinue if risks exceed known threat to public safety if capture is delayed
FELONY – PROPERTY	May pursue: continue to assess risks	May pursue; continue to assess risks	Do not pursue
MISDEMEANORS	May pursue: Continue to assess risks	Do not pursue, or discontinue	Do not pursue, or discontinue
INFRACTIONS	Do not pursue	Do not pursue	Do not pursue

165
166
167

168 C. Pursuit Deputy's Responsibilities

169

170 1. The pursuing deputy shall immediately notify the Communications Center
171 that a pursuit is underway. Pursuit communications should be conducted on
172 Dane County Sheriff's Channel 1 to allow other agencies the capability of
173 monitoring the pursuit. The deputy shall provide the Communications Center
174 with the following information:

175

176 a. Unit number;

177 b. Location, speed, and direction of travel of the fleeing vehicle;

178 c. Description and license plate number of the fleeing vehicle, if
179 known;

180 d. Number of occupants in the fleeing vehicle, and their
181 descriptions, if possible; and

182 e. Reason or reasons for the stop.

183

184 2. Failure to provide this information to the Communication Center may result
185 in an immediate decision by a Dane County Sheriff's Office supervisor
186 monitoring the pursuit, to order its termination.

187

188 3. Pursuing units should be limited to two (2) units unless there is more than
189 one occupant in the vehicle (to maintain a one-deputy or officer advantage).
190 If the situation dictates, the field supervisor could be a third unit. If possible,
191 the first assisting unit should take over radio communications as soon as
192 possible.

193

194 a. When multiple law enforcement vehicles are engaged in a pursuit,
195 deputies may consider the use of alternate siren sounds to alert the
196 public to the presence of more than one unit involved in the incident.

197 b. During the pursuit, deputies should maintain a safe distance from the
198 vehicle being pursued and others involved in the pursuit to enable
199 them to react to any sudden actions taken by the pursued vehicle and
200 lessen the possibility of a collision.

201

202 4. Assisting units should attempt to position themselves at strategic
203 points in anticipation of assisting when the suspect is stopped or becoming
204 the primary unit if the original pursuing deputy loses the suspect vehicle or
205 becomes disabled. The assisting unit(s) should advise the Communications
206 Center of his/her location and course of action.

207

- 208 5. Pursuits with Passengers Prohibited
209
- 210 a. Deputies with passengers, including prisoners, suspects, complainants,
211 witnesses, ride-alongs, or anybody else, except on-duty sworn peace
212 officers, shall not participate in a vehicular pursuit. This excludes off-
213 duty sworn Sheriff's Office personnel. This prohibition applies whether
214 or not the passenger has signed a waiver of liability.
215
- 216 b. Canine teams shall refrain from being involved in vehicle pursuits. The
217 Canine team(s) may immediately respond to the location where the
218 pursuit ends to assist in the apprehension of the suspect. Deviations
219 from this policy must be supported by specific facts and circumstances
220 which indicate an immediate and compelling need to apprehend
221 offender(s) who are an imminent threat to the safety of the
222 community.
223
- 224 D. Communication Center Responsibilities: Upon notification that a pursuit is in
225 progress, communication personnel shall immediately advise an on-duty field
226 supervisor or the Sheriff's Office OIC of essential information regarding the pursuit.
227
- 228 E. Inter-jurisdictional Pursuits
229
- 230 1. Deputies engaged in pursuit should request the dispatcher to notify
231 outside agencies if a Sheriff's Office pursuit is in or entering their
232 jurisdiction. The deputy should specify whether it is a request for
233 assistance or a courtesy notification.
234
- 235 2. When a pursuit is initiated by another jurisdiction, that jurisdiction is
236 responsible for the progress of the pursuit. Notification of a pursuit by
237 another law enforcement agency shall not be construed as a request for
238 deputies to join in the pursuit, unless a request is specifically made by the
239 pursuing agencies.
240
- 241 a. A Sheriff's Office supervisor shall determine if the pursuit is in
242 conformance with policy prior to authorizing assistance to another
243 agency.
244 b. If the pursuit is not in conformance with Sheriff's Office policy, the
245 supervisor may approve the use of Road Spikes and allow deputies to
246 redirect traffic away from the pursuit.
247 c. In any inter-jurisdictional pursuit, all Dane County Sheriff's Office
248 policies are in effect.
249

250 F. Supervisor's Responsibilities

251

252 1. Upon notification that a vehicular pursuit is in progress, the supervisor
253 shall assume responsibility for the monitoring and control of the pursuit
254 as it progresses.

255

256 2. The supervisor shall continuously review the incoming data to determine
257 whether the pursuit should be continued or terminated.

258

259 3. The supervisor should consider risk factors and the Pursuit Decision Making
260 Matrix in their decision process.

261

262 4. The supervisor shall be responsible for coordination of the pursuit as follows:

263

264 a. Directing pursuit vehicles into or out of the pursuit.

265 b. Designation of primary, support, or other backup vehicle responsibilities.

266 c. Approval or disapproval, and coordination of pursuit tactics.

267 d. Approval or disapproval to leave jurisdiction to continue pursuit.

268

269 5. The supervisor may approve and assign additional backup vehicles to
270 assist primary and backup pursuit vehicles based on an analysis of:

271

272 a. The nature of the offense for which the pursuit was initiated.

273 b. The number of suspects and any known propensity of violence.

274 c. The number of officers in the pursuit vehicles.

275 d. Any damage or injuries to the assigned primary and backup
276 vehicles or officers.

277 e. The number of officers necessary to make an arrest at the
278 conclusion of the pursuit.

279 f. Any other clear and articulable facts that may warrant the
280 increased hazards caused by additional pursuit vehicles.

281

282 G. Traffic Regulations During Pursuit

283

284 1. Deputies engaged in a vehicular pursuit are required to use emergency lights
285 and siren during the pursuit.

286

287 2. Deputies engaged in pursuit shall at all times drive in a manner exercising
288 due regard for the safety of themselves and all other persons and property
289 within the pursuit area.

290

291 3. Deputies are permitted to suspend conformance with certain traffic
292 regulations per State Statute 346.03 during a pursuit as long as due regard is

293 used when driving in a manner not otherwise permitted, and the maneuver
294 is reasonably necessary to gain control of the suspect. An emergency shall
295 not excuse failure to exercise due regard under these circumstances.
296

297 H. TERMINATION OF PURSUIT

- 298
- 299 1. A decision to terminate a pursuit may be the most effective means of
300 preserving the lives and property of the public, the officers and suspects
301 engaged in the pursuit.
302
 - 303 2. Pursuits may be terminated by the pursuing deputies, on-duty field
304 supervisor, the Officer in Charge, Field Captain, Chief Deputy, or Sheriff.
305
 - 306 3. When a deputy recognizes that the risk to the community outweighs the
307 necessity to apprehend the suspect, the deputy should terminate the
308 pursuit his or her self. Every member of the agency should recognize that a
309 decision by a deputy to discontinue a pursuit does not reflect on their
310 courage, but rather is recognized as a decision that indicates concern for
311 life and property.
312
 - 313 4. Pursuits should be immediately terminated in any of the following
314 circumstances:
315
 - 316 a. Risk Factors compared to seriousness of offense outweigh any danger to
317 the public if suspect is allowed to flee.
 - 318 b. Identity of the driver are known and suspect could be located later and
319 there are no extenuating circumstances to indicate the suspect would be
320 a danger to the public if allowed to flee.
 - 321 c. The distance between the pursuit and fleeing vehicle is so great that
322 further pursuit is futile.
 - 323 d. Risk factors indicate the danger posed to the public, the officers, or the
324 suspect by continuing pursuit is greater than the value of apprehending
325 the suspect(s).
 - 326 e. The deputy knows or has reason to believe the fleeing vehicle is being
327 operated by a juvenile who has committed a non-violent crime, and the
328 safety factors involved are obviously greater than a juvenile can handle.
 - 329 f. When any mechanical problem, regardless of severity, occurs to the
330 pursuing vehicle and/or if any malfunction of emergency equipment
331 occurs.
332
 - 333 5. Once a pursuit has been terminated, deputies shall deactivate their lights and
334 siren and return to normal speed and operation.

- 335
- 336 a. If a deputy comes in contact with the suspect vehicle again, and the
- 337 circumstances are not different than those that caused the termination
- 338 of the first pursuit, a second pursuit should not be initiated.
- 339 b. Deputies are encouraged to check the roadway along the path where the
- 340 vehicle was last seen.

341

342 II. Pursuit Tactics

343

344 The tactics selected should offer the greatest probability of success with the least

345 likelihood of injury to the general public, the deputy, and the subject. If a crash occurs

346 during the pursuit involving a third party, arrangements should be made to ensure that

347 the crash is attended to, and assistance is provided to those involved.

348 A. Use of Aircraft

349

350 If an aircraft is needed, the State Patrol Headquarters may be contacted at the

351 direction of the OIC, to ascertain whether the State Patrol or the DNR has an aircraft

352 in service and available to assist. The aircraft would be requested to maintain

353 surveillance on the suspect vehicle, warn units of any hazards ahead, and direct the

354 ground units to make the apprehension in an area that would be appropriate.

355

356 B. Vehicle Pursuit Management Technology (VPMT)

357

358 A Vehicle Pursuit Management Technology (e.g. StarChase) system allows deputies

359 to remotely affix a global positioning system (GPS) tracking device to a fleeing

360 vehicle, or to a vehicle for which there is a recognized probability of eluding. Use of

361 VPMT allows for remote tracking of the fleeing vehicle, subsequently eliminating

362 the need to follow the vehicle at high rates of speed. Deputies shall follow

363 guidelines in Section 200.144, Vehicle Pursuit Management Technology (VPMT.)

364

365 C. Induce to Stop Techniques

366

- 367 1. Channeling - This technique is used to divert or direct fleeing drivers from their
- 368 present direction and locale of travel into a direction and/or locale selected by
- 369 the police for the purposes of:
- 370
- 371 a. Relocating the pursuit to a safer, less-populated or less-traveled area;
- 372 b. Directing the driver to a location more favorable to the application of
- 373 other forcible stop techniques; or
- 374 c. Diverting the fleeing suspect to a location where further attempts to
- 375 elude are impractical and/or impossible.

376

377 The following general guidelines and considerations apply to channeling:

- 378
379
380
381
382
383
384
385
386
- a. Usually, only one alternative route should exist.
 - b. The number of police units shall be dictated by the route selected.
 - c. The selected location must provide the fleeing driver with sufficient sight and maneuvering distance.
 - d. No private vehicles should be used unless authorized by a supervisor.
 - e. If possible, all non-related traffic should be diverted away from the selected location.
- 387
388
389
390
391
392
393
2. Road Spikes - The Road Spike System is an effective tool designed to deflate pneumatic tires at a controlled rate, resulting in the safe and effective conclusion to the pursuit. The Road Spike System may be utilized upon approval of a Dane County Sheriff's Office supervisor. Deputies shall follow the guidelines in Section 200.145, Road Spike System.
 3. Pursuit Intervention Technique (PIT)
- 394
395
396
397
398
399
400
- a. The location of the PIT must be one where a loss of traction would present minimal danger to innocent third parties.
 - b. This technique should only be performed by personnel who are trained and certified in the tactic.
 - c. The PIT maneuver may be utilized upon approval of a Dane County Sheriff's Officer supervisor
- 401
402
4. Boxing In
- 403
404
405
406
407
408
409
410
411
- a. This technique is available, but because of the heightened risk to the deputy, it is highly discouraged. This does not prevent the deputy from blocking a path of a suspect, who is stationary, to prevent flight. Care should be taken, however, as this puts a deputy at a tactical disadvantage.
 - b. Because this tactic puts the deputy at a tactical disadvantage, this technique should not be used if the suspect(s) are known or believed to be armed.
- 412
413
414
415
416
417
418
419
420
5. Roadblock (with escape route) - A roadblock is the placement of vehicles or other objects on the roadway to impede or alter the normal flow of traffic. In a roadblock with an escape route, the roadway is either not completely blocked or an alternate "escape route" is provided. The intention is to provide a show of force to convince the suspect that escape is impossible and induce him or her to give up. Here are some guidelines for using roadblocks with an escape route:
 - a. The roadblock should be set up on a straight, level stretch of roadway

- 421 with adequate sight distance to give the suspect time to stop.
422 b. If possible, other traffic should be diverted away from the location.
423 c. Emergency lights must be turned on and visible, to warn the suspect
424 (and any other motorists) of the roadblock in time to stop.
425 d. The roadway can be blocked with squads (with emergency lights
426 on), traffic cones, flares, and/or other barricades.
427 e. The escape route should be obvious.
428

429 D. Force to Stop Techniques 430

431 Generally, the use of forcible stops such as ramming, and roadblocks without an
432 escape are a last resort measure and should be authorized by a supervisor. Forcible
433 stops may be undertaken only when the deputy or a supervisor has reason to
434 believe the continued movement of the pursued vehicle would place others in
435 imminent danger of great bodily harm or death; and that the apparent risk of harm
436 to others is so great as to outweigh the apparent risk of harm involved in making the
437 forcible stop; and after other reasonable alternative means of apprehension have
438 been tried, considered, or rejected as impractical.
439

- 440 1. Ramming - Ramming is considered deadly force, as there exists a likelihood of
441 serious bodily injury to the deputy and/or the suspect. As such, this technique
442 is limited to situations where the suspect presents an imminent threat of death
443 or great bodily harm to others. It may be justified as a last resort under
444 extreme circumstances. It should only be used if all other options are
445 exhausted.
446
- 447 2. Roadblock (no escape route)
448
 - 449 a. A roadblock with no escape route is considered deadly force when
450 there exists a likelihood of serious bodily injury, should the suspect run
451 into the barricade. As such, this technique is limited to situations where
452 the suspect presents an imminent threat of death or great bodily harm
453 to others.
 - 454 b. Privately-owned vehicles, such as tractor-trailer units, should not be
455 utilized during these techniques unless all other attempts have failed
456 and their use is authorized by a supervisor.
 - 457 c. Occupied vehicles shall not be used as a barricade.
 - 458 d. Every effort should be made to either divert or stop other traffic
459 before it reaches the roadblock.
 - 460 e. Normally two police units are utilized.
 - 461 f. Set up on a straight, level stretch of roadway.
 - 462 g. Emergency warning lights shall be on and visible. There shall be
463 adequate visual warning for both the violator and other motorists, so

- 464 that they can stop.
- 465 h. Exit the squad after the roadblock is set up and assume a position of
- 466 cover that would provide the best tactical advantage for the deputy.
- 467 i. The squad should be faced toward the pursuit and positioned so the
- 468 headlamps are not blinding oncoming traffic, including the fleeing
- 469 driver.
- 470

471 III. Post Pursuit

472

473 Safety is critical at the conclusion of a pursuit. At no time is the need for decisive action,
474 self-control, and strict personal discipline more essential. The responsibility for
475 maintaining control and directing activities at the conclusion of the pursuit remains with
476 the primary pursuing unit in the pursuit unless relieved by a supervisor.

- 477 A. Consideration should be given to using accepted "high-risk" stop procedures.
- 478 B. Non-uniformed deputies shall ensure they are readily identifiable as a deputy sheriff.
- 479 C. As soon as practical after the pursuit, the deputy should upload the in-car video.
- 480 In a case where the squad would need to be towed, the towing company should
- 481 tow the squad to a location to upload the video, prior to taking the squad to the
- 482 tow yard.

483 IV. Pursuit Reports

484

- 485 A. The primary deputy is responsible for completing the pursuit report and is
- 486 responsible for ensuring that the following information is included:
- 487
- 488 1. Time pursuit initiated and terminated.
 - 489 2. Pursuit distance to the nearest 1/10th mile.
 - 490 3. Maximum speed (primary unit only).
 - 491 4. Location pursuit initiated and terminated.
 - 492 5. Reason for initial stop.
 - 493 6. All violations known/suspected at initiation of pursuit.
 - 494 7. All violations discovered after/during incident.
 - 495 8. If a crash occurred, the estimated value of property damaged and the
 - 496 extent of injuries if applicable.
 - 497 9. The name of the field supervisor responsible for monitoring the pursuit as
 - 498 well as the On-Duty Officer in Charge (OIC.)
 - 499
- 500 B. The primary deputy is responsible for filling out and Validating the Vehicle Pursuit
- 501 Form in TraCS. The supervisor monitoring the pursuit is responsible for reviewing the
- 502 validated form and then marking it Complete in TraCS.

- 503 1. A single Vehicle Pursuit Form should be completed for each pursuit that a law
504 enforcement agency is involved in. If a pursuit is terminated and the initiated
505 again, two Vehicle Pursuit Forms should be completed.
- 506 2. Regardless of whether a law enforcement agency is the primary pursuing
507 agency or assisting agency, each agency involved in a pursuit must fill out a
508 Vehicle Pursuit Form to capture data from the start of their involvement to the
509 end of their involvement.
510
- 511 C. Supervisors involved and monitoring the pursuit shall complete a supplemental
512 report.
513
- 514 1. Report shall document and support his/her involvement and decisions.
515 2. Report shall include his/her decision-making considerations for either
516 allowing the pursuit to continue, or terminating the pursuit.
517
- 518 V. Training and Review
519
- 520 A. Training
- 521 1. All deputies who are not already certified as Wisconsin law enforcement
522 officers, shall receive training on police pursuit standards, guidelines, and
523 driving techniques during the Wisconsin Basic Law Enforcement Recruit
524 Academy.
- 525 2. The Sheriff's Office shall provide its deputies with ongoing and updated
526 training in emergency vehicle operations and pursuit policy procedure
527 and tactics.
- 528
- 529 B. Supervisor Review
- 530 1. Preferably, on the same day of the pursuit, but within three workdays, the
531 monitoring supervisor should debrief with the deputy (ies) involved in the
532 pursuit.
- 533 2. The review should include reason for pursuit, actions during the pursuit and
534 outcome.
- 535 3. Review should include viewing of in-squad video, audio from 9-1-1 Center, and
536 the deputy's report.
537
- 538 C. The Sheriff's Office shall maintain a Use of Force Review Committee and a separate
539 Pursuit Review Committee.
540
- 541 1. The Pursuit Review Committee will review pursuits within 60 days.
542 2. Review will include reports, video and audio of the pursuits

- 543 3. Review will determine whether Sheriff's Office Code of Conduct, policy or
- 544 procedures were followed.
- 545 4. Evaluate if the policy is clearly understandable and effective to cover the
- 546 situation.
- 547 5. Determine if Sheriff's Office Training requires revision.
- 548 6. All findings of policy violations or training inadequacies shall be reported to the
- 549 appropriate supervisor of the division for resolution.

550
551 D. Pursuit Policy Review Committee shall review this and related policies and
552 procedures biennially on even-numbered years.
